SUMMARY

iOS Developer with **5 years** of experience building **scalable, production-grade** iOS applications using **Swift, UIKit, SwiftUI, and MVVM**. Experienced in modular architecture, TCA, CI/CD, performance optimization, automation, and production stability across **FinTech, Automotive, Healthcare, and Travel domains**. Strong collaborator in **Agile** teams focused on delivering high-quality mobile applications.

WORK EXPERIENCE

HSBC Bank (Pune, Maharashtra) — Software Engineer Nov 2024 - Present

- Enhanced and maintained **15+ reusable iOS libraries and plugins** powering multiple customer-facing journeys on HSBC's global mobile platform.
- Designed and developed an **Optimizely-based experimentation plugin** enabling A/B testing and phased rollouts, now used across 5+ customer journeys.
- Improved application startup performance by approximately **30%** through adoption of **mergeable libraries and dependency optimization**.
- Led **KTLO operations for an 8-member pod**, handling production stability, release support, issue resolution, and application optimization.
- Built an **AI-driven crash analysis dashboard** that automates crash symbolication, root-cause detection, code ownership mapping, and solution recommendations, reducing manual debugging effort by **85%** and improving production issue resolution time by **70%**.
- Developed an **AI-powered certificate pinning automation tool** that automates configuration updates, branch creation, commits, and pull request generation, reducing manual effort and deployment risks by **90%**.

Tata Consultancy Services (Pune, Maharashtra) — Systems Engineer Jul 2021 - Nov 2024

- Developed and maintained the **Mercedes-Benz Korea (MBK) Care** iOS application using **Swift** and **MVVM** architecture, delivering multiple production-grade features and enhancements.
- Built customer-facing features including account management, embedded WebViews, permissions handling, API integrations, and backend-driven workflows.
- Improved application quality and release reliability by implementing **Appium-based** automation and optimizing **CI/CD** workflows, reducing manual testing effort by **30%**.
- Collaborated with backend, web, QA, and cloud teams across Dev/UAT/Prod environments to resolve production issues and support seamless releases.
- Served as **Sub-Project Lead** and **Agile SPOC** for the MBK project, coordinating deliveries, issue tracking, and cross-functional communication.

PROJECTS

Safarjala (iOS) - [Appstore Link](#)

Re-architected a multilingual travel booking platform supporting 12 languages, improving booking flows, pricing modules, and API integrations.

Safarjala Activity Owner (iOS) - [Appstore Link](#)

Built and enhanced the activity management platform for vendors, implementing multilingual support, booking management, dynamic pricing, calendar-based slot scheduling, and backend-driven workflows.

Caria Health (iOS) - [Appstore Link](#)

Modernized a healthcare application by upgrading dependencies, migrating to iOS 13+, resolving legacy code issues, improving application stability, and supporting successful TestFlight and App Store releases.

EDUCATION

July, 2017 - May, 2021

Bachelor of Technology (B.Tech.) in Computer Science
University Institute of Technology, Rajiv Gandhi Proudtyogiki Vishwavidyalaya (RGPV), Bhopal, M.P.
GPA: 8.39/10

SKILLS

Languages & Frameworks

Swift, UIKit, SwiftUI, Python.

Architecture & Design

The Composable Architecture (TCA), MVVM, Modular Architecture, SOLID Principles, Dependency Injection.

iOS Development

Swift Concurrency (Grand Central Dispatch, Async/Await), REST APIs, Deep Linking, Push Notifications, Localization, Memory Management, Unit Testing.

Tools & Platforms

Xcode, Git/GitHub, Azure DevOps, CocoaPods, Swift Package Manager (SPM), Appium, AppDynamics, GitHub Copilot.
